Biostatistics

Mailman School of Public Health
Columbia University Irving Medical Center

I will participate in a take home exam for the course Data Science II. I read and understand the Mailman School of Public Health Honor Code, and pledge to abide by the letter and spirit of that code. I pledge that I will not communicate with any person (by any means about any part of the exam), during any portion of the exam, and I will enforce this policy for myself and for others by neither initiating nor tolerating any such communication. The work I submit will be my own.

I, as a student in the Department of Biostatistics, understand the importance and seriousness of this exercise andunderstand the consequences of violating the honor code.
